

VOXTOK NAMED AS 2015 CES INNOVATION AWARDS HONOREE

New York, USA – November 2014 – Voxtok today announced that it has been named a 2015 CES Innovation Awards Honoree for **High Performance Home Audio/Video**. Products entered in this prestigious program are judged by a preeminent panel of independent industrial designers, independent engineers and members of the trade media to honour outstanding design and engineering in cutting edge consumer electronics products across 28 product categories.

Voxtok's Audio Capsule incorporates an Audiophile player, a multi-room music server, a storage unit and a CD ripping function, controlled by a very simple tablet & TV app. It integrates a set of advanced services (catalogs of music, backup and streaming).

"We're very proud for being selected by this prestigious panel of industrial judges", says Joel Reboul, the CEO and co-founder of Voxtok. "Our Hi-Res Audio system, the Audio Capsule, will be officially released during the CES2015. We're currently engaging our operations in the US and Europe, promoting our vision of what modern HiFi really is."

The prestigious CES Innovation Awards are sponsored by the Consumer Electronics Association (CEA)[®], the producer of the International CES, the global gathering place for all who thrive on the business of consumer technology, and have been recognising achievements in product design and engineering since 1976.

Voxtok's Audio Capsule will be displayed at the 2015 International CES, which runs Jan. 6-9, 2015, in Las Vegas, Nevada. The company will showcase the system on their booth (Eureka park – 75605) and in a private suite for High-end demonstrations.

Entries are evaluated on their engineering, aesthetic and design qualities, intended use/function and user value, how the design and innovation of the product directly compares to other products in the marketplace and unique/novel features present.

Products chosen as CES Innovation Honourees reflect innovative design and engineering in some of the most cutting edge tech products and services coming out on the market.

2015 CES Innovation Honouree products are featured on CESweb.org/Innovation, which lists product categories, as well as each product name, manufacturer information, description, photo and URL.

About Voxtok

Voxtok aims at providing the best music experience to Audio and TV Markets. Voxtok designs high-end connected Hi-Fi devices based on its flagship product, Voxtok Music, which brings catalog access, Music Intelligence and Cloud services. The company makes available these technologies and solutions, such as HbbTV SDK, Voxtok Music for TV and connected features, for the TV and audio industries. Voxtok operates from the US, France (R&D) and soon in Asia (Taiwan). For more information, please visit www.voxtok.com and follow us at @voxtok, Facebook and LinkedIn to join the conversation.
